Take part in the biggest nationwide survey of COVID-19 infections past and present. Your support will help guide the response to this pandemic, to get us all back to normal life.

www.ons.gov.uk/cis

Why have I been asked to take part?
To help the ongoing fight against the coronavirus we need households like yours to join the thousands already taking part in the COVID-19 Infection Survey.

We are not just testing people who have signs of having the virus, like fever or cough, because we know that sometimes people can get the virus without symptoms.

Taking part in this study is entirely your choice. All the information you give us is protected by law and is treated as confidential.

Everyone in the survey can receive a COVID-19 vaccination when they are eligible to do so – and people who have received a COVID-19 vaccination can be in the survey.

What is the survey about?
The aim of the survey is to find out how many people have COVID-19, either with or without symptoms.

- This is particularly important as more people start getting vaccinated against COVID-19. Although the vaccines work very well, they do not completely stop people getting the virus again and neither does having had COVID-19 in the past. We need to monitor how well the vaccines work in the real-world, and how well the combination of people having had COVID-19 before and getting vaccinated stops the virus spreading.
- Since April 2020, the Office for National Statistics and the University of Oxford have been conducting the survey on behalf of the Governments of the UK.
What does the survey involve?

- First you will need to register to take part, after which you will be contacted to make an appointment.
- At this appointment, a member of the survey team will come to your home. They will ask some questions about each person over the age of 2 who wants to take part.
- They will show those who are 12 years or older how to take throat and nose swabs that will be tested for the virus. The swab is a soft sponge on a stick and doesn’t hurt. Parents or carers can help those under 12 years old.
- The survey team member will not enter your home, will have appropriate PPE and maintain social distancing.

You could agree to:

A. one visit only
B. the first visit and a visit every week for one month (5 visits in total)
C. the first visit, a visit every week for one month, and then 11 monthly visits (16 visits in total over 1 year)

Why should I take part?

The coronavirus continues to impact us all. **Together we can provide vital information** to help guide the response to this pandemic, to get back to normal life.

A fast and reliable picture of infections in your area will help make sure local responses are appropriate and effective.

Over 2021 and 2022, thousands of households will take part in the survey. **This is so we can see what happens to the virus over this time,** particularly as more people get vaccinated.

The results are already being shared so that everyone knows what we are finding ([https://www.ndm.ox.ac.uk/covid-19/covid-19-infection-survey/results](https://www.ndm.ox.ac.uk/covid-19/covid-19-infection-survey/results)). None of this information identifies you or your family.
How to get involved:
To take part you will need to **register with us as soon as possible**: 

1. Call the registration team on 0800 085 6807. If you are unable to use the telephone, for example due to a hearing or speech impairment, you can email iqvia.covid19survey@nhs.net.

2. Once registered, the next time you will hear from us is when a survey team member contacts you the evening before your planned visit. If this time isn’t convenient for you, you can change it. We will try to contact you in the week after you register.

3. On the day of the appointment, a member of the survey team will arrive at your home to complete the visit. Please do not invite the survey team member into your home.

4. As a token of appreciation, **everyone who completes the survey will be offered a £50 voucher**.

What do I get for taking part?
Every person who takes part in the survey will receive a £50 voucher for the first home visit they complete.

For every further visit that they complete, **they will each receive a £25 voucher**.

These will just be for visits that are completed; for example, if the survey is stopped **you would not receive compensation for visits that don’t happen**.

What will happen with my data?
- Any information you give us is protected by law and is treated as confidential.
- All samples are collected on behalf of the Office for National Statistics and the University of Oxford.
- All testing of these samples is done by the University of Oxford and national Lighthouse Laboratories.
- You will be told the results of all tests you complete.
- The companies involved in running the survey will only use your information for the purpose of this survey – please see Participant Information Sheet for further details.
