USER INSTRUCTIONS

Read all instructions prior to collection

Procedure:

Most people take between 2 and 5 minutes to deliver a saliva sample following steps 1 to 5.

- 1 Spit into funnel until the amount of liquid saliva (not bubbles) reaches the fill line shown in picture #1.

- 2 Hold the tube upright with one hand. Close the funnel lid with the other hand (as shown) by firmly pushing the lid until you hear a loud click. The liquid in the lid will be released into the tube to mix with the saliva. Make sure that the lid is closed tightly.

- 3 Hold the tube upright. Unscrew the funnel from the tube.

- 4 Use the small cap to close the tube tightly.

- 5 Shake the capped tube for 5 seconds. Discard or recycle the funnel.
